Professional Summary

Licensed Software Development Engineer (Mexican Professional License No. 13980801) with 6+ years of experience delivering high-performance backend systems, web APIs, and enterprise cloud solutions using **C#, ASP.NET Core (.NET 8/10), and SQL Server**. Proactive, self-directed learner adept at leveraging **AI Engineering and LLM-assisted workflows** across the entire Software Development Life Cycle (SDLC)—from architecture and prototyping to automated testing and documentation. Proven track record at Resser Tecnologías and Jabil Circuit de México designing scalable RESTful microservices, event-driven Azure Functions, and integrating enterprise manufacturing environments (**MES, SAP**).

Technical Skills

- **Backend & Core:** C#, .NET 8 / .NET Core, ASP.NET Core Web API, .NET Framework, Entity Framework Core (EF Core), LINQ, Async/Await, Dependency Injection, RESTful APIs, OOP, Design Patterns.
- **AI Engineering & Methodologies:** AI-Augmented SDLC, Prompt & Harness Engineering, Rapid Prototyping, Scrum / Agile, Continuous Self-Learning.
- **Databases & Enterprise Systems:** Microsoft SQL Server, T-SQL, Stored Procedures & Query Optimization, MariaDB, Working Knowledge of MES (Manufacturing Execution Systems) & SAP basics.
- **Cloud & DevOps:** Microsoft Azure (App Services, Azure Functions, Cloud Storage), Azure DevOps (CI/CD Pipelines, Boards, Repos), Git, IIS Web Server, Firebase, Google Cloud Platform (GCP).
- **Frontend & Modern Web:** TypeScript, JavaScript (ES6+), Astro, Tailwind CSS, Angular, Vue.js, Bootstrap, HTML5/CSS3.
- **Testing & Quality:** Unit Testing (xUnit/NUnit), QA & Incident Prevention, Technical Documentation.

Professional Experience

Middle Backend Developer | Resser Tecnologías

Zapopan, Jalisco, Mexico | 2024 – 2026

- Architected and delivered robust RESTful Web APIs using C# and .NET Core 8, supporting critical fleet management and telemetry services.
- Implemented automated background processing and reporting pipelines leveraging Azure Functions and Azure Cloud services, improving operational data delivery speed.
- Managed relational database structures in SQL Server, writing complex T-SQL queries and stored procedures to enhance backend query execution times.

- Led Sprint deliverables and continuous integration workflows via Azure DevOps and Git, establishing rigorous code review and QA testing standards that decreased production bug rates.

Programmer Analyst I | Jabil Circuit de México

Guadalajara, Jalisco, Mexico | 2019 – 2024

- Designed, developed, and maintained enterprise web applications and internal backend APIs utilizing .NET Framework (C#) and Microsoft SQL Server.
- Collaborated with manufacturing operations teams to support data flows, reporting, and interface integrations with Manufacturing Execution Systems (MES) and SAP.
- Authored comprehensive technical architecture documentation, API specifications, and end-user training guides to streamline cross-team onboarding and compliance.
- Conducted systematic functional and regression testing, identifying bottlenecks and preventing system anomalies across manufacturing execution systems.
- Collaborated with international cross-functional engineering teams in agile environments to deploy feature updates on IIS servers.

General Incident Leader | Talent Network (Jalisco Talent Land)

Guadalajara, Jalisco, Mexico | 2017 – 2024

- Directed incident response, crisis resolution, and customer service operations for Latin America's largest tech innovation convention with 40,000+ attendees.
- Coordinated multidisciplinary support teams under high-pressure scenarios, ensuring adherence to data privacy standards and rapid resolution protocols.

Featured Projects & Technical Leadership

- **PetMePhone (AI-Augmented Mobile Application):** Engineered an Android task overlay application applying an end-to-end AI Engineering lifecycle (requirements synthesis, asset generation, code architecture, testing, and Google Play Store compliance).
- **Juegalajara Community Platform:** Contributed to code reviews, frontend architecture, and technical organization for Guadalajara's leading board game community portal.

Education & Credentials

- **Bachelor of Science in Software Development Engineering**
Licenciatura en Ingeniería en Desarrollo de Software
Centro de Enseñanza Técnica Industrial (CETI) | Graduated 2023
Mexican Federal Professional License: No. 13980801
- **Professional Technician in Computer Science**
Técnico Profesional en Informática
Escuela Preparatoria No. 10 – Universidad de Guadalajara (UDG)

Languages

- **Spanish:** Native
- **English:** Working Proficiency (Intermediate Reading & Listening Comprehension; Basic Written & Conversational Skills).
